---

SUMMARY:

I am a 3rd-year B.Tech student pursuing Electrical Engineering. I have a keen interest in Data Science and machine learning models. I have been learning about data and machine learning for several months and my aim is to work with an organisation where I can learn new skills and increase my abilities for the organisational goals as well as myself.

PROJECTS:

Spam Email Classifier:

- **Working:** Developed a machine learning-based spam email classifier using Python and Scikit-learn. Preprocessed email datasets using NLP techniques such as tokenization, stopword removal, and TF-IDF vectorization.
- **Tools Used:** Python, Scikit-learn, NLP (tokenization, stopword removal, TF-IDF), Machine Learning models (Logistic Regression, Naïve Bayes, SVM), Flask.

WhatsApp Chat Analyzer :

- **Working:** Developed a tool to parse and analyse WhatsApp chats
- **Tools & technologies used:** Python, Pandas, and Matplotlib to process data and visualise trends– extracting key insights like message frequency, sentiment, and user interaction patterns.

EDUCATION:

B.Tech in Electrical Engineering   **Nov 2022 - Present**
Malaviya National Institute of Technology Jaipur
CGPA: 6.83

Intermediate   **2022**
S Vivekanand Govt. Model School, Dungarpur
Board: CBSE
Percentage: 90.2%

Matriculation   **2020**
Mahaveer Public School, Udaipur
Board: CBSE
Percentage: 88%

TECHNICAL SKILLS:

Programming Languages: C++, Python, SQL
Tools/Technologies: NumPy, Pandas, Matplotlib, scikit-learn, MySQL
Concepts: Data Structures and Algorithms (DSA), Machine Learning

ADDITIONAL INFORMATION

Languages: English, Hindi
Achievements: Secured first place in 100m Sprint in the inter-school athletics competition.
